

AUSTLIFT MAXIBINDER 10MM MODIFIED MODEL WITH ADDED FEATURES

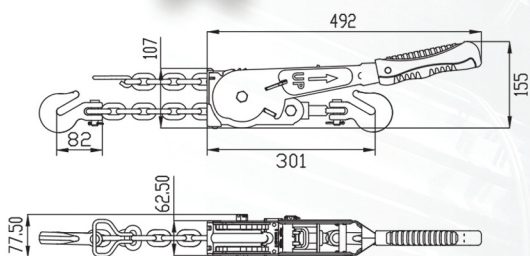

- For 10mm G70 Transport Chain Application
- Lashing Capacity: 6000kg
- Destructive Test: ≥12000kg
- Conforms to: AS/NZS 4344

LUMINOUS GRIP HANDLE

GRADE 80 SAFETY CLAW GRAB EACH END

The newly modified 10mm Maxibinder is an enhancement over its current design. This model was originally designed for underground coal industry, its new features can be a definite benefit to all other transport industries as a safety upgrade on existing design models.

ADDED FEATURES

- Safety trigger lock claw grabs, eliminating the chance of the load chain slipping out of the grab during setup or shifting of loads.
- Chain is held in a straight line, allowing easier tensioning and stops side loading of the lashing chain link.
- Luminous handle allowing drivers to view their loads at night via side mirrors or physically viewed for up to 6 hours after 30 minutes of direct sunlight to check for loose loads, artificial light will continue to charge the handle such as Led, Flood lights increasing the visual time-frame.
